Announces

# the New OPTIC CLEANSE™ Automated Cleaning Machine

## Non Contact Cleaning (NC<sup>2</sup>) Technology

PC based cleaning machine with color touch screen. Removes process variation by automating the cleaning and prepping cycle while the connectors are still in the polishing fixture.

**Available For Round and Square  
Configurations**

## Significantly Reduces Process Variation

Benefits of this technology include:

- Repeatabile connector cleaning and prepping process
- Programmable cleaning cycles to custom match cleaning requirements
- Elimination of scratches due to manual cleaning
- Password protection

**Patent Pending**

## Available Soon
